

2.1x3.5m FULLY COVERED GREENHOUSE

SKU#: GM1303

ASSEMBLY INSTRUCTION

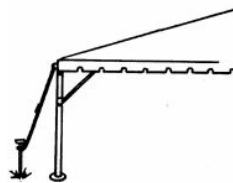

Important! Please read this information carefully before proceeding.

It is the user's responsibility to take the following precautions at all times.

- The Portable Fully Covered Greenhouse is designed for use as a temporary structure that assembles in minutes without tools.
- After construction, the portable fully enclosed green must be securely anchored to prevent damage caused by wind.

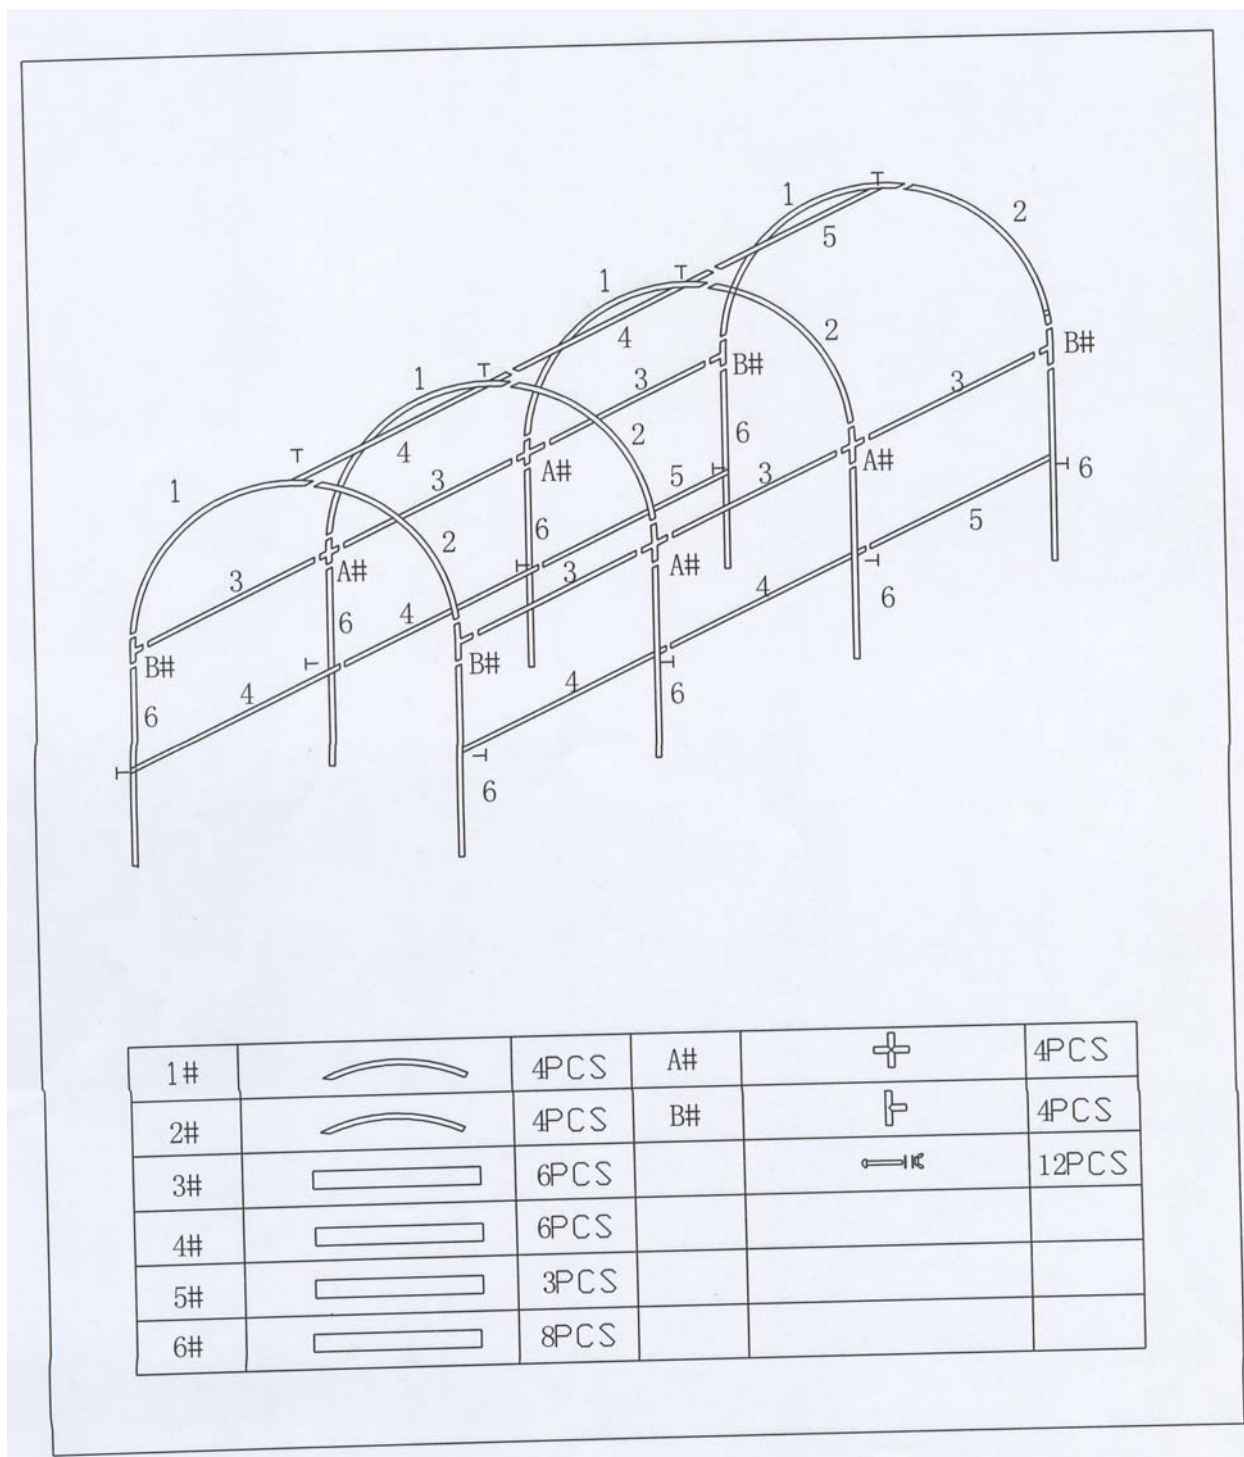

INSTALLING ANCHORS

The best way to anchor your greenhouse is with screw-in ground anchors and rope/cable attached to each leg. If you intend to secure your greenhouse more permanently you may want to a heavier cable. You may go to you local home improvement center, hardware store or any place that sells outside storage buildings.

Assembly Instruction

1. Place pipe #1, #2, #3, #4, #5 and corner #A, #B on the ground.
2. Connect pipes together starting from the center frame. Connect pipe #1, #2 and pipe #4, #5 by screw.
3. Then assemble each side. Connect pipes #3 with corner #A and #B.
4. Place the cover over the frame.
5. Lift one side of greenhouse and insert legs #6. Repeat on the other side.
6. Connect pipe #4, #5 to pipe #6 by screw.
7. Anchor greenhouse with tie-down ropes and stakes in windy days.

IMPORTANT!

This item is **NOT** intended as a Permanent Structure. The Warranty for this item does **NOT** cover Act of GOD such as heavy rains, high winds, accumulation of ice or snow, or any other natural occurring disasters!
